

mlcourse.ai – Open Machine Learning course. Bonus assignments

Welcome

Hi! In this mlcourse.ai [JupyterBook](#) you'll find your Bonus Assignments. The book is organized in 10 topics closely following the publicly available mlcourse.ai self-paced learning program. In each section, you'll find a short intro to the topic (with links to the corresponding course materials), an assignment, and a solution to the assignment.

To launch the JupyterBook, go to the `_build/html/` folder and open [index.html](#) with your favourite browser. Note that JupyterBook is read-only. So the best way to work with the assignments is to run `jupyter-notebook` (not to be confused with `jupyter-book`) from the root directory `mlcourse_ai_bonus_jupyter_book`, and then make a copy of the notebook to work with as shown below.
